

LIVE VIEW

Operators and fleet managers can not only track the location of their vehicles with **Live View** but are also able to view the images being generated from the on-board cameras in real time. This has many benefits in being able to demonstrate visually proof of delivery or collection, whilst assisting in driver behaviour and ongoing training thereby reducing insurance claims and costs. Talk to our sales team to learn more about this feature packed system and our cloud hosted data subscription service.

SENTINEL SYSTEMS LTD

Sentinel Systems has been serving the transport industry with safety equipment since its formation in 1986. Over the years we have designed, developed manufactured, supplied and installed tens of thousands of safety products and systems across the UK and overseas. Our knowledge base is extensive in finding solutions to meet all manner of applications.

- We offer a no quibble 2-year warranty on all our equipment, to include installation when carried out by our in-house service technicians. Our after sales service is second to none. We do not fit and forget.
- We look forward to being your trusted partner for vehicle safety equipment.

SPECIALISTS IN VEHICLE SAFETY Camera Systems & Reversing Solutions

Our purpose is to save lives and protect property

CAMERA SYSTEMS & REVERSING SOLUTIONS

We are one of the leading specialist providers and installers of safety equipment for the plant, van, bus and commercial vehicle industry across the UK. Our own team of experienced and in-house trained service technicians are on hand to install our range of proven, robust and tested camera systems and reversing solutions to all types, ages and make of vehicles.

We operate across both the private and public sectors and will have value for money solutions for the single owner/driver through to operators of the largest UK multi vehicle fleets. Talk to our knowledgeable technical sales team today to begin the process of finding the right safety equipment to make your vehicle meet FORS and future compliance requirements.

Why not join our satisfied customers who operate within the parcel delivery, waste collection and disposal, water, food, general retailing, fuel distribution and logistics sectors together with public sector Local Council Authorities up and down the country.

CAMERA SYSTEMS WITH DVR

Our Analogue High Definition (AHD) camera systems enhance visibility and reduce blindspots

Features include:

- High definition DVR's with 4, 8 or 12 channels with options for GPS, WIFI and 3/4G
- Monitors, both analogue and HD in 5", 7" and 10" screen sizes

Live View enables fleet managers to see where their vehicles are located at any time, as well as remotely view the images being generated from the on-board cameras in real time.

CYCLIST SIDE SCAN DETECTION

When travelling at a set low speed in built up areas, ultrasonic detectors placed down the side of the vehicle will activate to warn the driver of a cyclist undertaking pass. This is further enhanced when the left turn indicator is on by the monitor switching to full screen view of the rear facing side scan camera.

Options include:

- Large rear mounted LED Flashing warning cycle sign
- Audible and flashing light alarms on side of vehicle

REVERSING SYSTEMS

Our range of camera, ultrasonic and radar reversing aids detect stationary or moving objects and people behind a reversing vehicle, helping prevent injury and damage to the vehicle and third party property.

Features include:

- Visual monitor screen
- Visual and audible proximity to an object
- SafetyStop™ automatically applies the brakes bringing the vehicle to a safe stop
