

Using the latest vehicle CCTV technology, Sentinel's 7" TFT monitor provides a crystal clear image so your driver can see his surroundings at all times. With four video inputs available, you can opt for a single reversing camera or choose to have full coverage with side and front cameras as well.

The 7" monitor is also ideal when combined with a Sentinel™ 4 or 8 channel DVR for ultimate vehicle protection.

- 7" High-brightness TFT monitor with anti-glare sunshade
- Four video inputs for better blind-spot coverage
- Fully adjustable fan style mount
- Reduces vehicle damage and potential vehicle downtime
- All cabling is supplied with screw-locking, watertight connectors
- 12-36V
